

COCKWELLS

CAREERS

Marine electrician

As an electrical engineer, your duties are to support the engineering team and yard operations team across new builds, refit works and yard machinery maintenance.

Essential requirements:

- Experience working on the maintenance, troubleshooting and new installation of marine electrical and electronic equipment and systems including 12VDC, 24VDC and 240VAC.
- Ability to read electrical drawings and following equipment installation manuals.
- A clear and methodical work approach with the administrative skills to mark-up drawings to As Built (by hand on paper is fine), check and correct BOM, labelling cables, components and equipment to current marine standards and industry best practices.
- Willing to take responsibility to sign off installation of their own work and working with management to improve quality control processes and documentation.

Beneficial experience:

- Specifying and designing electrical systems including power distribution from AC and DC supplies.
- 2D CAD or equivalent software capable of making electrical drawings.

If you feel you are the person we are looking for please send us a C.V. and covering letter to info@cockwells.co.uk
