

COCKWELLS

APPRENTICESHIP

Marine Engineer

Are you looking to start a career in marine engineering? This is a fantastic opportunity, for an enthusiastic individual, to join a highly skilled team of craftsmen and women, at Cockwells Modern & Classic Boatbuilding Ltd, as an Apprentice Boat builder.

On a day-to-day basis you will be undertaking the following tasks:

- Installing engines or systems from detailed drawings and schematics.
- Conferring with superiors and design personnel in order to clarify or resolve problems.
- Investigating and observing tests on machinery and equipment for compliance with standards.
- Conducting environmental, operational, or performance tests on marine machinery and equipment.
- Preparing technical reports for use by engineering, management, or sales personnel.
- Maintaining records of engineering department activities, including expense records and details of equipment maintenance and repairs.
- Servicing of electrical, heating, ventilation, refrigeration, water, and sewage systems.
- Working in a clean yet productive manner.
- Any other tasks as may be reasonably assigned by senior management in order to progress the needs of the company.
- Performing services and winterisation to inboard diesel engines.
- Fitting and servicing engines into new boats.
- Fitting and testing ancillaries into new boats.
- General servicing of refit work.
- Electrical and hydraulic work.

Desired skills

Applicants are expected to:

- Have some relevant technical skills
- Be able to, and enjoy, working with their hands
- Have good attention to detail

- Be fastidious and neat and tidy
- Have good communication skills and a strong work ethic
- Be able to work to specifications and tight deadlines.

Personal qualities

Applicants are expected to:

- Be able to use their own initiative
- Be able to solve problems and be logical
- Be pro-active and diligent
- Be creative and curious
- Be punctual and enthusiastic
- Be organised and dexterous
- Have good data entry processing skills
- Have a sense of humour and be able to work well in a team

Desired qualifications

- 2 GCSEs in English and mathematics (or equivalent).

Training provider

As part of this apprenticeship, you will need to achieve the Level 3 Marine Engineering, before undertaking the final End Point Assessment. Assessor support will be provided in the workplace. College attendance will be required at Falmouth Marine School, one day per week. You will be required to undertake Functional Skills Level 2 in English and Mathematics (if not already held).

Apprenticeship standard

Marine Engineer

Future prospects

On successful completion of this apprenticeship the right candidate may have the opportunity of a full time permanent position with this rapidly growing company. There may be opportunities to work abroad.
