

COCKWELLS LAUNCH 8M CONVERTIBLE LIMOUSINE FOR INTERNATIONAL MARKET

Sunshine yellow and pewter grey. SMARTGLASS® control and joystick manoeuvring. The warmth of teak combined with cool grey caulking. This latest creation from Cockwells Modern & Classic Boatbuilding transports superyacht tender design to another level.

T/T Scout is like no other. She doesn't just reflect the bold stature of her mothership – the 63m motor yacht that was custom built in 2018 by Hakvoort Shipyard in the Netherlands – her vibrant hull and ingenious technology imbue her with a personality all of her own.

Providing luxurious accommodation for ten guests and two crew at a rapid 37 knots, T/T Scout is touchscreen heaven. Slide the dual-sectioned glass roof half way, fore or aft, to semi-enclose the saloon or open it fully to recline beneath a cobalt blue sky. Close it completely to offer respite from the searing heat of the midday sun or protection from inclement weather, and access the

temperature-controlled saloon from the cockpit through electric twin doors. Take in panoramic views through SMARTGLASS® that can be tinted to offer protection from ultra-violet rays. All at the touch of a button.

This exceptional tender can also be driven via joystick control from the helm, in three different modes, with the added advantage of a reversing camera and a bow thruster. But

this is no conventional joystick control. This is intelligent design that incorporates two engines working independently and a GPS computer system that determines how they move, which means that T/T Scout can manoeuvre in any direction.

"In every aspect, the finish of T/T Scout is to superyacht standard and we are proud to have matched the quality and performance of her mothership," explains Founder & Managing Director, Dave Cockwell. "T/T Scout offers the ultimate in flexibility. Throw open the roof and enjoy exposure to the elements or close it fully to cool down or warm up. With her electric windows and touchscreen roof, T/T Scout combines stylish luxury, optimal performance and innovative technology, all of which position Cockwells at the forefront of contemporary boat design."

JACK-IT – LEAD YOUR LINES EASY!

Finally, the unfortunate handling of the shore power cable has a solution. Thanks to jack-it, the cable is simply inserted along the mooring line and never hangs accidentally in the water.

The jack-it offers several attachment options.

It can be fastened to mooring lines, railings, stanchions, harbour bollards or along the front side of a landing stage by means of cable ties, hook loop tape/Velcro or ropes up to 8 mm diameter. Thus, you can run shore power cable and water hose easily and neatly from

the connection point / tank on the dock to the socket on board your yacht. The jack-it can stay on the mooring line while you enjoy a day on the water.

jack-it is produced in Germany. It is made of polycarbonate, UV resistant, seawater and oil resistant and extremely robust. Various attachment options with Velcro straps, cable ties or even moored into the mooring make jack-it an indispensable helper. Available in the colours gray, navy, black or translucent, every jack-it is a real eye-catcher.

The price for a package with three jack-it is €51 plus VAT. Jack-it is available from selected retailers or by e-mail at mail@proQ.org.
