# Little devils

Sam Fortescue picks nine new tenders that will have you yearning to jump the mothership

## AXOPAR 37 ◀

Redesigned from the hull up for superb stability in rough seas and sporty handling with phenomenal grip, the distinctive Axopar 37 comes in three models. The Spyder has an open cockpit, the Cross Cabin has a new enclosed deckhouse and the Sun-Top is the best bet for watersports. The ergonomics have been improved for the driver, with better all-round vision, and the forward cabin now sports a cool gullwing door. [axopar.fi](http://axopar.fi)

*The striking new 37XC Cross Cabin has a sliding canvas roof to open up the deckhouse*

## MAZU 42 ST ◀

Turkish builder Mazu has designed this boat specifically to sidestep city congestion and offer a fast, comfortable way to commute between the European and Asian sides of Istanbul. Based on the proven hull of the 42 Walk Around, the ST has an enclosed deckhouse for all-weather comfort and a double cabin and shower below. It has a hint of military styling, with high bulwarks for protection, and its twin Volvo IPS600 engines put out a huge 870hp. [mazuyachts.com](http://mazuyachts.com)

One half of the two-part glass roof slides open to bring the elements into the saloon

**COCKWELLS T/T SCOUT ▲**

In striking sunshine yellow, Cockwells' latest custom limo tender for the 64-metre Scout packs lots of innovative technology into a carbon-epoxy hull. First and foremost, she has a touchscreen-controlled glass roof, which can be fully opened or closed depending on conditions. Smart glass windows can be tinted at a touch, and there's full climate control behind electric cockpit doors. Joystick driving combines two independent Volvo D3 engines with a bow thruster for superb manoeuvrability. [cockwells.co.uk](http://cockwells.co.uk)

**SICHTERMAN LIBERTAS 15 ►**

Pitched at five-star luxury, this Dutch-designed boat is also exceedingly versatile and efficient, with a 500nm range at its 30-knot cruising speed. Its fast planing hull is a departure for Sichterman but will be used on larger boats in the future. Two models exist: a comfortable limo tender version and a capable dayboat for longer, fast open-water passages. Accommodation includes a large double cabin. [sichterman.com](http://sichterman.com)

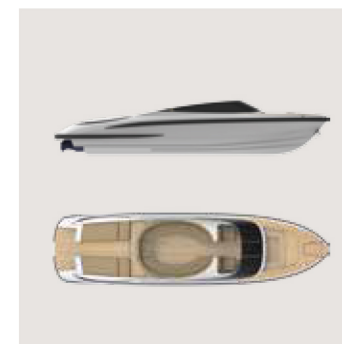

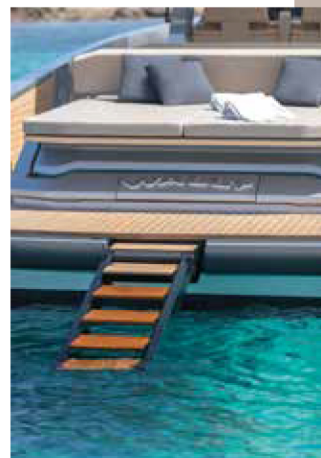

Hull lines of the Libertas are by Van Oossanen, while Cor D Rover has designed everything else

**WALLYTENDER 48 ►**

When it launched in 2001, the original Wallytender made an immediate impact. The new 48 is a restyle of that model with a brand new hull, and is the first from Wally specifically optimised for Volvo IPS drives. It retains the characteristic drop-down bulwarks aft and offers a compact but comfortable cabin and shower room below. [wally.com](http://wally.com)

**CASTOLDI JETTENDER 34 ◀**

When it launches in 2021, the Jet Tender 34 will be Castoldi's new flagship. Robustly built in Kevlar and vinylester resin with a lattice of foam sandwich stringers, the boat will be a real workhorse. At its heart are two of the Italian brand's powerful 284 HCT water jets, capable of pushing it to 50 knots lightly loaded. Sleek lines and a stylish oval seating arrangement inside give it real presence. Get an order in now. [castoldijet.it](http://castoldijet.it)
