

# MODERN CLASSICS

Cockwells Boatbuilding wins 'superior super yacht tender' at the international ShowBoats Design Awards.

Those of you who keep up with On The Water may remember when we took a look at superior yacht builders, Cockwells and its team of master boat builders. Ranging from the classic to the modern, Cockwells is deservedly renowned in the industry for the supreme quality of build and individuality in every boat the team lays their hands on.

Lovingly and individually made, no boat is the same, with expert craftsmanship and attention to detail oozing from every inch. What's more, while heritage certainly feeds into what the team does, they're adept at infusing modern technology and design into classic and traditional builds.

Recently, the impressive company scooped an international industry award for 'superior super yacht tender', at the prestigious ShowBoats Design Awards 2017, for its Limousine.

The 9.5 metre vessel, built to tender an 88-metre superyacht, is testament to Cockwells' versatility in delivering exclusive custom builds without compromising an inch on quality or seaworthiness. With a top speed of over 30 knots, the Limousine boasts a sumptuous saloon of soft leather and a warm wood comfortably seating up to 12 guests.

◀ The hardworking Cockwells team  
▶ A well-deserved award for Dave

Cockwells Founder and Managing Director, Dave Cockwell says: "We are thrilled to have won this highly contested category of a truly global industry awards scheme, especially one that included such excellent tenders from Compass and Aston Martin.

"This award is testament to our winning partnership with renowned naval architect, Andrew Wolstenholme, as well as the skill and ingenuity of our in-house team of designers, technicians and craftsmen. Their capacity to custom-build, in exquisite detail, to the precise requirements of our growing client base

is second to none and I'm proud to share this award with them."

Every aspect of the Cockwells building process, from the sawing of raw timber to the stunning finish of a boat's interior is expertly undertaken. The team are incredibly passionate about what they do and boast an absolutely incredible portfolio. They love a challenge too and when we spoke with them back in our second issue, they informed us that taking on the jobs that other boat builders deem impossible is what they love doing the most!

And, as new members join the Cockwells ranks in what is fast becoming a highly

modernised industry, the seasoned artisans work alongside them, teaching them the craft that makes the company stand out from the crowd, reinforcing its ethos of being a traditional boat builder in an increasingly modern world.
