## COCKWELLS

### 13M OPEN CATAMARAN TENDER

Pairing our extensively-researched and tested twin-hull design with Hamilton Jet drives and a choice of engines offering top speeds in excess of 50 knots, our 13m Open Catamaran tender delivers both exceptional performance and a spacious, practical deck layout.

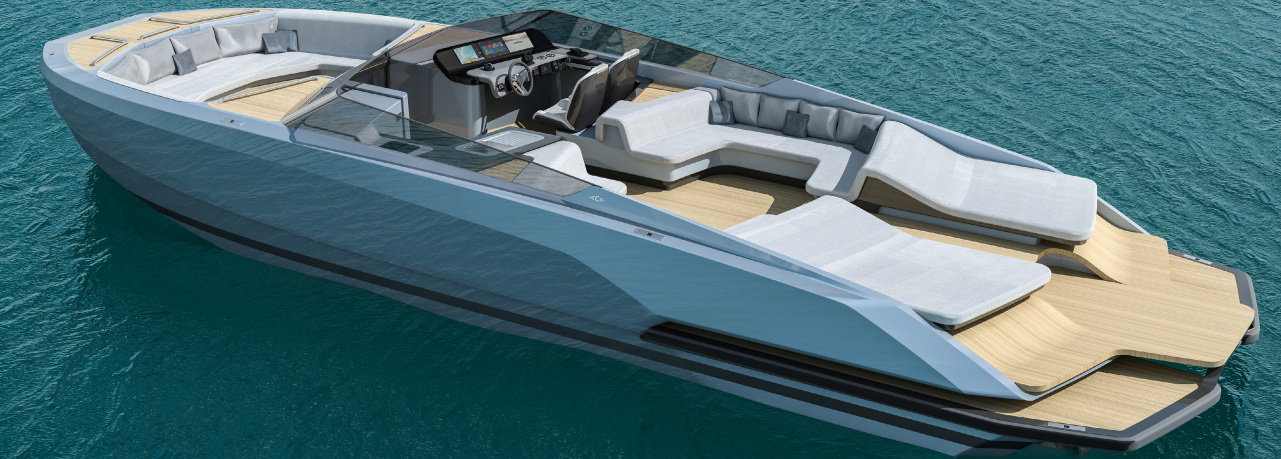

Clean design lines and superyacht quality finish throughout enable guests to enjoy every aspect of this vessel, whether onboard or admiring from afar. Inward facing seats in the main cockpit; a comfortable seating area with removable infill cushions in the bow and two aft facing sunpads with space for four provide plenty of space for relaxation. A spacious galley and day heads are situated opposite the modern helm, with conveniently placed controls and whole ship switching as standard.

In line with your requirements, we can design this craft with a two-part, hydraulically-folding bow ramp, as well as a raising t-top Bimini to provide shade for guests and crew, which also lowers electronically for stowage in your mothership's garage.

Whether you seek the ultimate tender for your superyacht, or a sporty, versatile day boat, our 13m Open Catamaran tender is sure to turn heads, wherever you venture.
