COCKWELLS

Duchy Motor Launches

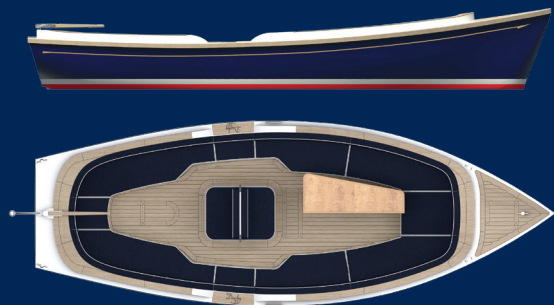

Do you seek the polished styling and relaxed handling of a custom build without the high-end price tag? Then look no further than our Duchy Motor Launches

Classically designed by Cockwells, in collaboration with Andrew Wolstenholme, Duchy Motor Launches are handcrafted, semi-production vessels that are created by skilled craftsmen who combine the traditions of the shipwright with modern luxury, technology and performance.

Built from low-maintenance composites, you customise the interior to create something that is distinctly yours; tailored to meet your precise requirements. From custom-made stainless steel Ôttings, the choice of timber for the interior joinery and upholstery fabric to custom crockery and powering options, we ensure that your Duchy is exactly what you want it to be – a classic yacht for a modern world that chimes perfectly with your way of life. You also join a discerning group of Duchy owners and become part of the Cockwells family.

COCKWELLS

ABOUT COCKWELLS

At Cockwells, we take pride in designing and building bespoke yachts, motor launches and superyacht tenders to your precise requirements and our exacting standards.

Combining the artisan skills of the shipwright with innovative engineering and boatbuilding techniques, we custom-build vessels of the highest quality for leisure and commerce in the modern world.

We aim to replicate the boat-buying experience of bygone days for those who appreciate the precision and artistry of traditional craftsmanship, the benefits of technological advances and the polished styling of the 21st century.

When you commission from Cockwells, we work with you to create a vessel that stands out from the crowd with outstanding performance, understated elegance and relaxed handling that resonates with your lifestyle. Whatever your specifications, we realise your unique design without compromise.

Please call or email us to discuss your requirements
