- Electric flush WC
- 12v DC system
- 240V AC Charging when connected to shore

COCKWELLS

LIIT 37

Designed to the same specification as Ocean Fauna with all its handcrafted detail, this semi-displacement, twin-screw wooden motor vessel has extra length and a sleeker profile to provide the additional benefit of a luxuriously-appointed fore cabin with double berth.

Twin 225hp Volvo D4 engines provide a cruising speed of 15 knots and a maximum speed of 24 knots that can be reached in 15 seconds. With approximate fuel consumption of 50 litres per hour at 18 knots, she is also economic to run for a boat of this type.

Motorboat & Yachting magazine documented this build and joined us on her sea trials. You can read the article in News and Press section of our website.
