COCKWELLS

OCEAN FUGUE

Powered by two Nanni 200hp engines, Ocean Fugue is a semi-displacement, twin-screw wooden motor vessel.

With the visual appeal of a classic motor launch, Ocean Fugue is a state-of-the-art yacht with LCD Smart Glass that turns opaque at the flick of a switch; a full fly-by-wire control system that holds the boat to a set position and helm screens that monitor all on-board electronics. Inside, you will find a sumptuous fore cabin with double bed, galley, heads and saloon. You can access the bathing platform from the spacious cockpit through a gate in the transom. LED toe-rail lights guide you around the side decks at night where quick release smartlock fender clips are located for easy mooring.
