

SUPERYACHT TENDERS

9m Modular Tender

Perfect for yachts which require a flexible craft for use by guests and crew. Custom modules are lowered on board to create a range of guest tenders or left on board the mothership or support vessel to provide the crew with the space to transport a small car or all-terrain vehicle – or to use as a wash down or work boat platform.

Year launched	2021
Hull construction	Composite
Length overall	9m / 29ft
Beam (max)	3.06m / 10ft 1in
Design draft	0.46m / 1ft 6in
Displacement	2.8 tonnes
Engine	Twin 300hp OXE outboards
Maximum speed	50 knots

COCKWELLS

9M MODULAR TENDER

For superyachts that require a flexible craft for use by guests and crew, our new 9m Modular Tender features ingeniously-designed custom modules that are lowered on board a base boat to transform it into a luxurious enclosed limousine; a fast guest transfer shuttle with jockey-style seating for up to 12 guests; a beach club with DJ station and BBQ grill; or, indeed, any other bespoke module to match your precise specifications.

With a proven seaworthy hull that makes for a comfortable ride, the 9m Modular Tender's twin 200hp diesel engines possess the power to transport a small car or all-terrain vehicle at 44 knots whilst an electrically-operated integrated bow ramp allows easy boarding and loading from ship, shore and sand.
